EAMP v1 — Accessibility as a Network Advantage

"In the AI agent economy, accessibility isn't a feature—it's a network advantage."

EAMP v1 is the only framework that ensures your site works seamlessly for **both humans and AI agents**. We scan, write fixes, test them, and submit PRs—making your site ready for the AI-powered future where agents evaluate and select each other.

Benefits for You

Accessibility Users	Clearer alt text, richer transcripts, plain-language explanations.
AI Agents	Structured JSON metadata allows smarter ranking, trust, and selection.
Businesses	Compliance + competitive edge in agent-driven marketplaces.
Developers	Automated fixes, easy integration, future-proof codebase.

Easy-to-Understand Scenarios

■■■ A blind user hears concise alt text while their AI assistant fetches Layer 2 metadata to narrate the full dataset.

■ An AI agent crawls your site and selects it over competitors because of its rich accessibility metadata.

■ A business owner gains trust, adoption, and compliance—all while preparing for the AI agent economy.

Key Takeaway

Accessibility isn't just compliance—it's a **competitive advantage**. With EAMP v1, you ensure your platform is usable by people with disabilities AND future-proof for AI ecosystems. **Accessible sites will be the ones AI agents choose, trust, and recommend.**
